LAN BASED RECRUITMENT

SW2 INTERFACE SHOWING TOOLBAR & ALL ICONS

ProjectHouse

SW2 is a comprehensive recruitment solution that allows users to enjoy a simple, high-level interface to a database running across a Local Area Network. For many years, SW2 has been the mainstay of many successful recruitment companies and with our commitment to enhancing and upgrading SW2, you can ensure that your sales teams are investing more time in dealing with candidates and clients whilst SW2 handles administration and tracking.

Diary Registration Form About Save & Close

AUTO-POPULATE & TEXT SEARCH

Entering information into any database system is a time consuming process. SW2 gives you the ability to auto-populate information by simply reading a CV.

Information is then retrieved by using a variety of simple, yet powerful search mechanisms to include high speed CV text searching.

SW2 even allows you to search CV'S held outside of the system.

CLIENT COVERSHEET WITH CONTACT & HISTORY

Details for clients are easily accessed and maintained allowing you to record full contact management to include CV & interview tracking.

DIARY

The diary module allows the consultant to plan their activity by tracking scheduled events, generated tasks, interview & cv logs and group diary recording. Entries are either made manually by the consultant or automatically by the system as a reminder of a previous activity, such as a letter to a client enclosing an applicants CV or confirming interview details.
